Space Administration

Langley Research Center
Hampton, Virginia 23681-2199

FS-2005-01-88-LaRC

Economic Impact Summary for Fiscal Year 2004

Building on a respected research foundation, Langley supports the NASA missions of exploration systems, aeronautics, science, and space operations. Langley contributes to the exploration of the Moon, Mars and beyond and making aircraft and the national air transportation system safer, more efficient, and more secure. Our science research is learning more about the atmosphere, and how human activities influence it, for a better understanding of global change. The NASA Engineering and Safety Center, which serves as an independent technical resource, is also located at Langley. The Center's influence extends beyond its technology contributions to being a solid financial contributor to the local, state, and national economy. For fiscal year 2004, the total direct and indirect impact was over \$2.61 billion.

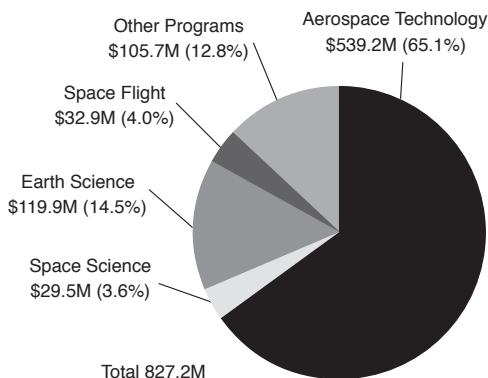

Annual Budget

		Langley, \$M	
Fiscal Year	NASA, \$M	¹ NASA Center Sources	² All Sources
2000	13,600.0	606.0	630.5
2001	14,253.2	651.0	668.6
2002	14,901.7	720.2	751.0
2003	15,000.0	823.3	864.3
2004	15,378.0	782.3	827.1

¹Includes Langley Research Center programs funded from other Centers.

²Includes Langley Research Center programs funded from NASA HQ, other NASA Centers, industry, and government.

Economic Impact Study and Analysis for Fiscal Year 2004¹

Economic impact studies measure direct and indirect effects on an area's economy. Direct impact refers to an agency's spending on goods and services, its various sources of income, and employment level. Indirect impact is the effect of the agency's spending and employment level on other sectors of the economy through the multiplied impact of spending and job creation. The indirect impact is an estimate of the impact of various businesses and industries that depend on the spending of income and other expenditures generated

by an organization. NASA Langley is a very large economic generator. Its direct impact can therefore best be analyzed by evaluating its employment level, payroll budget, contract and grant spending, and research and development. The total economic impact is the combined effect of both direct and indirect effects on the local area in terms of total output, earnings, employment, and general economic growth.

As the table indicates, NASA Langley's total direct outlay of \$797,865,085 increases economic output in the region by a total of \$1,813,119,812 for a combined impact of over \$2.61 billion.

Output Spending Impact for Fiscal Year 2004

Category	Direct spending, \$K²	Indirect impact, \$K
Engineering and business services	346,646	790,354
Payroll	242,144	561,775
Construction, new, repair, and maintenance	67,064	151,566
Colleges, universities, and schools	60,275	132,605
Equipment	41,860	95,022
Utilities 17,009	32,317	
Transportation (travel)	9,146	21,035
Health services	1,066	2,504
Miscellaneous services	12,655	25,943
Total	797,865	1,813,120
Total impact	2,610,984,897
